EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Title

The title has been changed to read as follows:

--Electronic Catalog Method--.

In the Claims

This application is in condition for allowance except for the presence of claims 1-18 to an invention non-elected without traverse (see Office action mailed October 12, 2004 and subsequent response by Applicant filed January 11, 2005).

Accordingly, claims 1-18 have been cancelled.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Regarding claim 20

The prior art or record neither anticipates nor fairly and reasonably teaches a computer-based method comprising, *inter alia*, the steps of electronically generating verification information that is usable to verify the authenticity of the header and body sections, the verification information at least partially based on the header and body sections; and storing the verification information in a footer section of the electronic catalog.

Regarding claim 45

The prior art of record neither anticipates nor fairly and reasonably teaches a method comprising, *inter alia*, receiving a first electronic catalog, the first electronic catalog including first authenticity information indicating that the first source of information and first object information is authentic, the first authenticity information at least partially based on the first source information and the first object information; and generating a second electronic catalog, the second electronic

catalog including the first electronic catalog, and second authenticity information indicating that the second source information and second object information is authentic, the second authenticity information at least partially based on the first electronic catalog, the second source information and the second object information.

Regarding claim 53

The prior art of record neither anticipates nor fairly and reasonably teaches a method comprising, *inter alia*, generating an electronic catalog, the electronic catalog including a digital signature, the digital signature based on the source information, validity information, ordering method information, and at least one object entry.

The most remarkable prior art of record is to Perkowski (U.S. Patent No. 5950173). Although Perkowski teaches an e-commerce environment, Perkowski does not disclose verification information at least partially based on a header section and a body section; and storing the verification information in a footer section of the electronic catalog. Additionally, Perkowski does not disclose second authenticity information indicating that second source information and second object

information is authentic, the second authenticity information at least partially based on a first electronic catalog, the second source information and the second object information. Finally, Perkowski does not disclose a digital signature, the digital signature based on the source information, validity information, ordering method information, and at least one object entry.

Moreover, none of the prior art of record remedies the deficiencies found in Perkowski.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
